

MARTIN COUNTY SCHOOL DISTRICT

Where Learning Has No Boundaries

FROM THE SUPERINTENDENT

April 30, 2009

Today, the Florida Department of Education released the results from the Writing Portion of the FCAT, which was taken by 4th, 8th, and 10th grade students. Here is how our students scored compared to other Florida school districts for the percentage of students scoring at or above proficiency (3.5):

MCSD 8th Grade Scores: #1 in the state

MCSD 10th Grade Scores: Tied for #1 in the state

MCSD 4th Grade Scores: Tied for 5th highest in the state

This is the first year that the Martin County School District has had writing scores from two grade levels rank #1 in the state on the FCAT Writing. In addition, there are many notable accomplishments by individual schools throughout the district. Congratulations to all of our teachers, students, administrators, and staff for your hard work each and every day. This is truly a team effort. Thank you for all that you do to help our students succeed. A link to the district's press release regarding the scores is attached to this update.

Sincerely,
Nancy Kline
Superintendent
Martin County School District
